The Patient's Role in Initiation of Therapy: Improved Engagement Leading to Improved Adherence

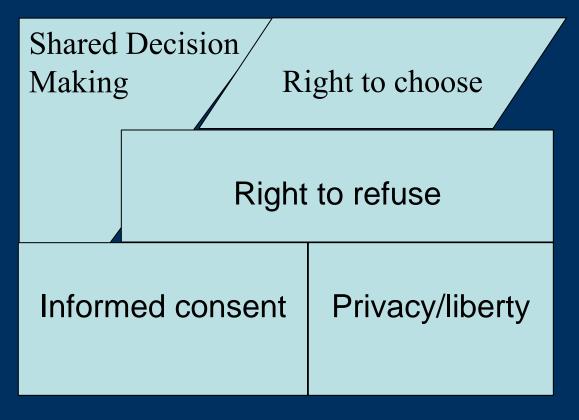

Larry Allen

University of Colorado
October 22, 2016 – Organized Systems of Anticoagulation Care Summit

Presenter Disclosure Information

- I will not discuss off label use or investigational use in my presentation.
- I have financial relationships to disclose:
 - Employee of: University of Colorado
 - Consultant for: J&J/Janssen, Novartis, ZS Pharma
 - Stockholder in: None
 - Research support from: NIH / NHLBI, PCORI, AHA
 - Honoraria from: None

#1: Legal Requirement

Union Pacific R. Co. v. Botsford, 141 U.S. 250, 251 (1891).

Schloendorff v. Society of New York Hospital, 211 N.Y. 125, 105 N.E. 92 (1914)

Superintendent of Belchertown State School et al. v. Joseph Saikewicz, Mass., 370 N.E.2d 417, 1977 Cruzan v. Director, Missouri Department of Health, 497 U.S. 261 (1990)

#2: From Duty to Policy to Payment

PERSPECTIVE SHARED DECISION MAKING

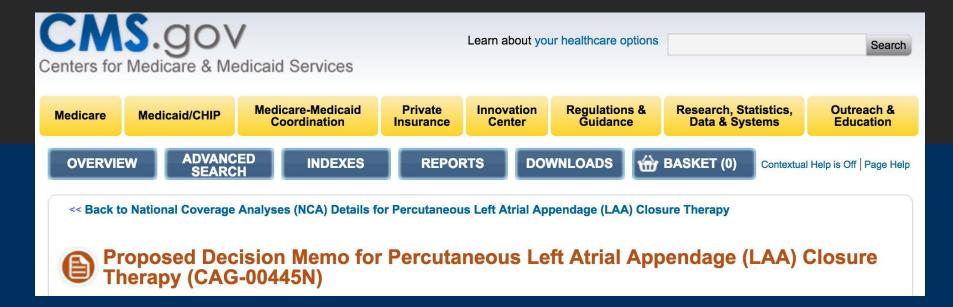

Shared Decision Making — The Pinnacle of Patient-Centered Care

Michael J. Barry, M.D., and Susan Edgman-Levitan, P.A.

Nothing about me without me.

— Valerie Billingham, Through the Patient's Eyes, Salzburg Seminar Session 356, 1998 tive of patients: respect for the patient's values, preferences, and expressed needs; coordinated and integrated care; clear, high-quality information and education for the patient and family; physical comfor the rest of one's life, and screening and diagnostic tests that can trigger cascades of serious and stressful interventions.

For some decisions, there is one clearly superior path, and patient

"A formal shared decision-making interaction between the patient and provider using an evidence-based decision tool on anticoagulation in patients with NVAF must occur prior to LAAC, must be documented in the medical records, must include a discussion of the benefits and harms, must document an appropriate rationale to seek a non-pharmacologic alternative to anticoagulants, taking into account the safety and effectiveness of the device compared to anticoagulants, and have, after being informed of the reported risks of LAAC and reasonable alternative management strategies, given informed consent."

#3: Recognize Types of Medical Decisions

- 1. <u>Benefit >> Risk</u>: <u>Behavioral counseling</u> is used when scientific evidence for benefit strongly outweighs harm (e.g. smoking cessation, beta-blocker for HFrEF), and decision support designed to describe, justify, and recommend is most appropriate.
- 2. <u>Benefits ~ Risks</u>: *Shared decision making* is most easily applied to *preference-sensitive* decisions, where both clinicians and patients agree that equipoise exists, and decision support helps patients think through, forecast, and deliberate their options.

Anticoagulation

Behavioral Support

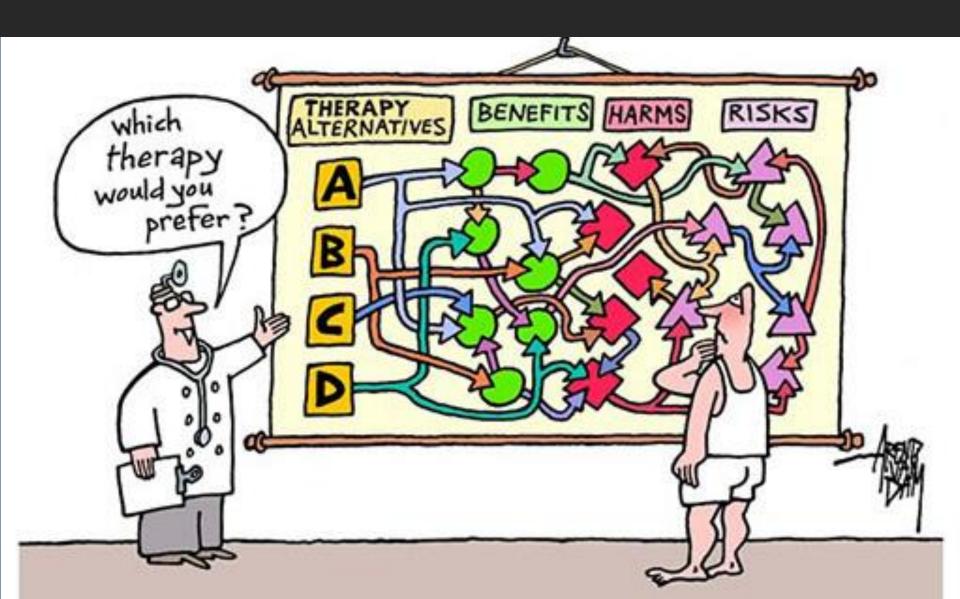

Shared Decision Making

VKA for LVAD OAC for CHADSVASc=6 OAC CHADSVASc=2 moderate bleeding risk LAAC v. VKA v. NOAC CHADSVASc=1 for CHADSVASc=3 Moderate-high bleeding risk

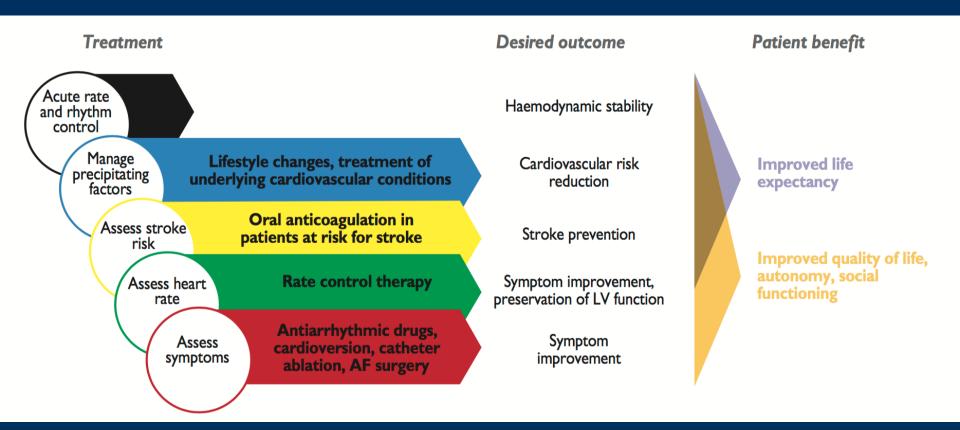

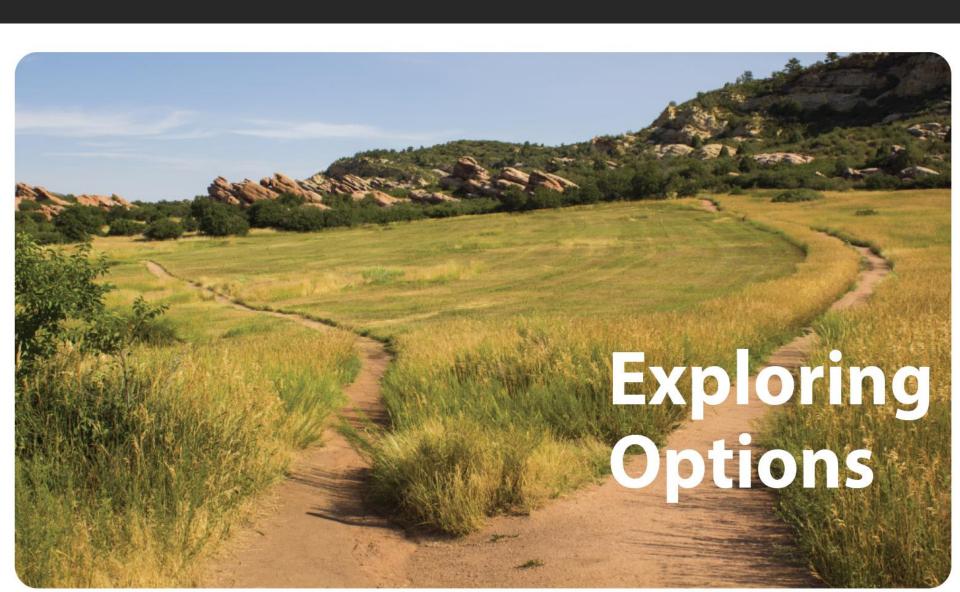

#4: Recognize Complexity

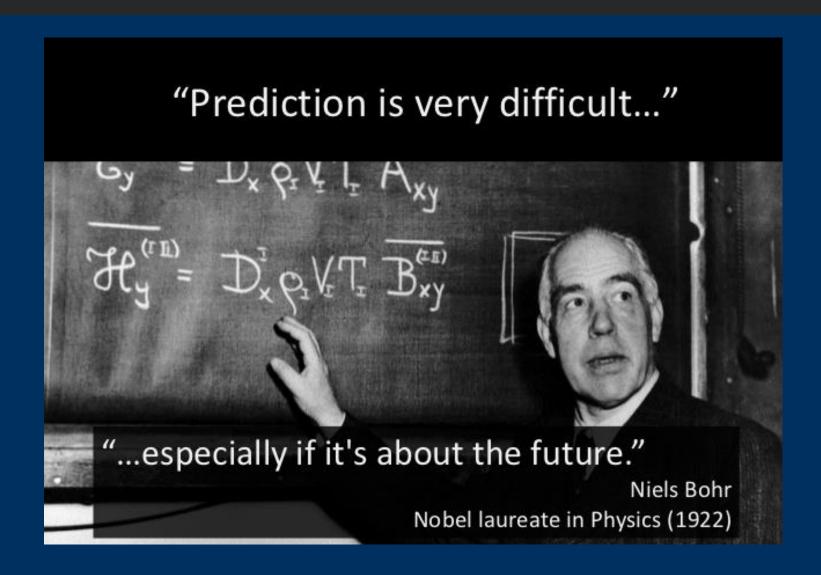

New Diagnosis of Afib ...

Break it down

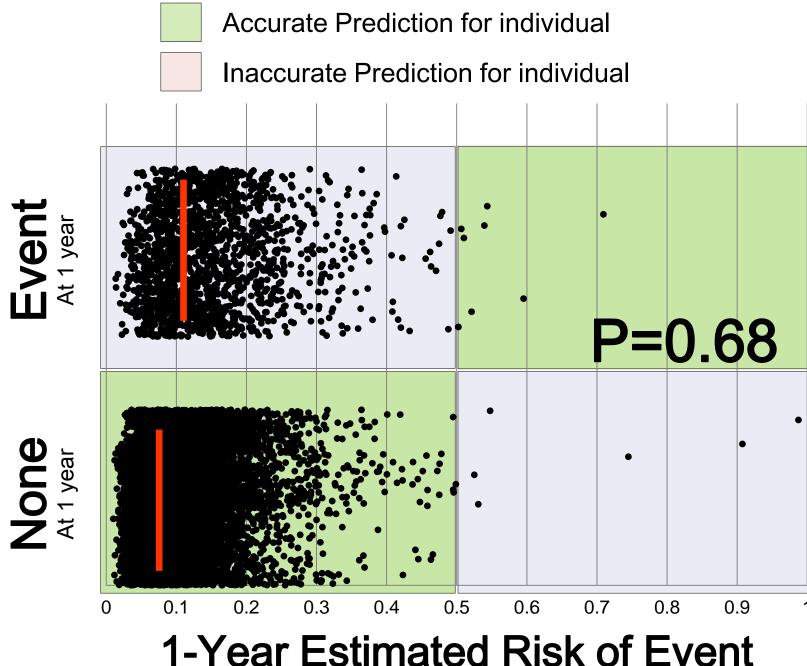

#5: Convey Risks and Benefits

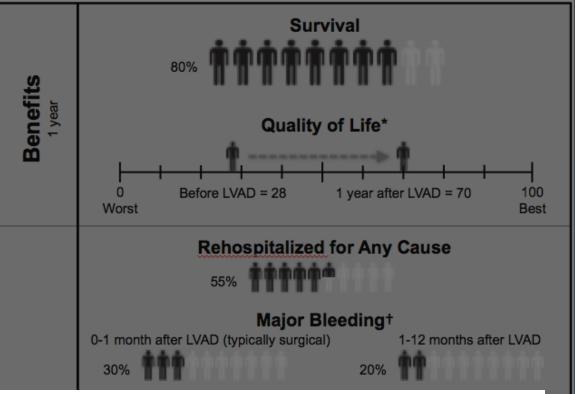

Population v. Individual

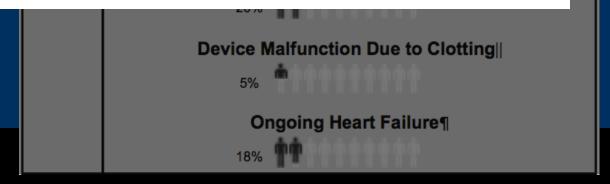

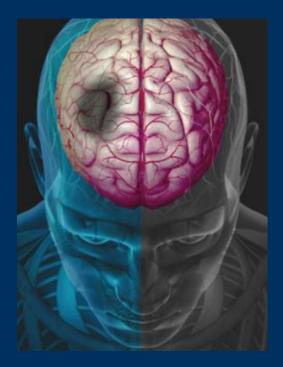

What might my life look like with each option?

The numbers below are a summary of information collected from recent medical studies. However, no one can know what will happen to an individual person.

#6: Weigh Future Unexperienced Events

"Would you rather have a stroke or a GI bleed?" Really??

#7: Beyond Education

RATE CONTROL

Treatment to make sure the heart doesn't beat too quickly during AFib.

RHYTHM CONTROL

Treatment to restore the heart's rhythm to a normal state, and keep it there.

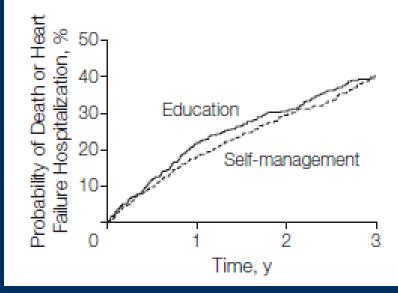

ANTICOAGULATION MEDICATION

(Blood Thinners)
to reduce stroke risk.

LIFESTYLE CHANGES

Get regular exercise, eat a heart-healthy diet, don't smoke, watch alcohol and caffeine intake.

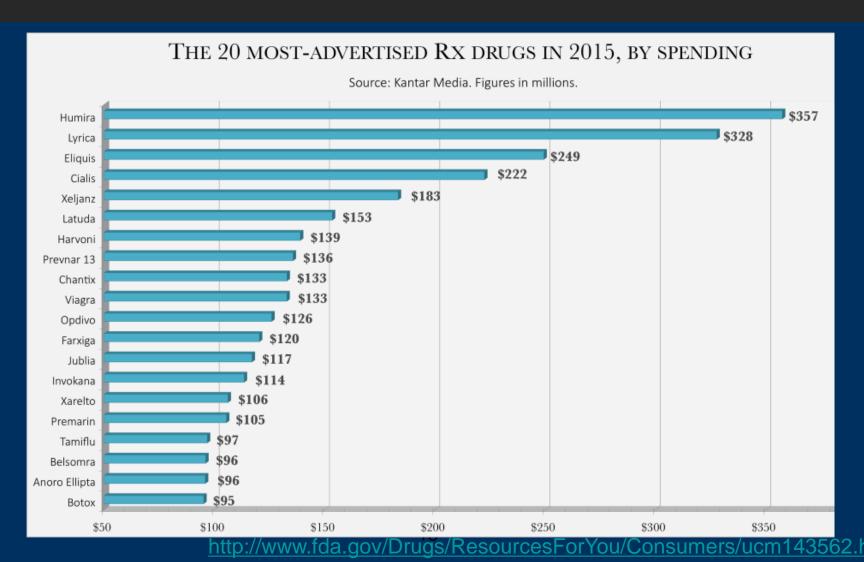

Direct-To-Consumer

decision support for prescribing Patient
education for adherence and self care

Direct-to-Consumer Not Lost By Industry

#8: Heuristics

Careful Use of Testimonials

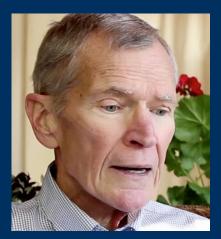

HeartMatePro.com
