

ACC.06 ABSTRACT CATEGORIES

Myocardial Ischemia and Infarction

Myocardial Ischemia/Infarction--Basic
Unstable Ischemic Syndrome--Clinical
Acute Myocardial Infarction--Therapy
Unstable Ischemic Syndrome/Long-Term Outcome
Stable Ischemic Syndrome
Cardiopulmonary Resuscitation/Emergency Cardiac Care/Shock
Coronary Artery Bypass Surgery/Innovative Techniques

Vascular Disease, Hypertension, and Prevention

Vascular Biology/Atherosclerosis/Thrombosis/Endothelium
Vascular--Pathophysiology--Basic/Angiogenesis/Gene Therapy
Vascular--Pathophysiology--Clinical
Peripheral Arterial/Carotid Disease/Aortic Disease
Venous Thrombosis/Pulmonary Embolism/Pulmonary Hypertension
Pharmacology/Hormones/Lipids--Basic
Pharmacology/Hormones/Lipids--Clinical
Hypertension
Risk Assessment and Reduction/Rehabilitation

Valvular Heart Disease

Adult Cardiothoracic Surgery/Valvular Surgery
Valvular Disease

Cardiac Function and Heart Failure

Myocardial Function/Heart Failure--Basic/Molecular
Myocardial Function/Heart Failure--Clinical
Cardiomyopathies/Myocarditis/Pericardial Disease
Cardiac Transplantation/Assist Devices--Basic and Clinical

Cardiac Arrhythmias

Electrophysiology--Basic
Clinical Electrophysiology--Supraventricular Arrhythmias
Clinical Electrophysiology--Ventricular Arrhythmias
Cardiac Pacing
Defibrillation/Implantable Antiarrhythmia Devices
ECG/Ambulatory Monitoring Signal Averaging

Diagnostic Testing

General Echocardiography: TTE
Echocardiography: 3-D, TEE, and Intracardiac Echo
Stress Echocardiography
Contrast Echocardiography
Tissue Imaging
CT
MRI
Nuclear Cardiology/PET
Exercise Physiology and Testing

Pediatric Cardiology and Adult Congenital Heart Disease

Pediatric Cardiology and Adult Congenital Heart Disease
Congenital Heart Surgery

Special Topics

Quality of Care and Outcomes Assessment
Biomedical Computing/Information Technology
Innovative Models for Practice, Education, or Research
