

DON'T MISS INTERVENTION2005'S
COMPANION COURSES!

Join Us At

HeartFOCUS2005
A NURSING AND TECHNOLOGIST FOCUS

JUNE 2, 2005
ATLANTA | MINNEAPOLIS

HeartFOCUS2005 is a one-day companion program to Intervention2005 designed for nurses and technologists. This year, HeartFOCUS2005 will occur concurrently with Intervention2005 on Thursday, June 2, 2005.

HeartFOCUS2005 will discuss topics such as Angiogenesis, Women & Heart Disease, Drug Eluting Stents, Vascular Closure Devices, Bifurcated Lesions, PCI, Imaging and more! Fees are only \$95 if you register before February 1st! CE will be provided at the symposium. To register or for more information, visit our website, www.HeartFocusSymposium.com.

Intervention 2005 JUNE 4-5, 2005
Fellows C³ Summit BOSTON
CORONARY COMPLICATIONS COURSE

Fellows – Before you head out into the real world...don't miss this amazing educational opportunity to present your case to our prestigious Faculty! The **Fellows C³ Summit** (Coronary Complications Course) is held directly after the Intervention2005 live symposium at the Boston site. The course will focus on the review of challenging cases and complications. All cases reviewed at the course will be presented by Fellows, with discussion led by the Faculty. Prizes will be awarded to the top cases!

The course is supported by an educational grant from Cordis Corporation, which provides Fellows with airfare, hotel accommodations and registration. Please visit our website, www.InterventionSymposium.com, to register or for additional information.

SYMPOSIUM INFORMATION

The 2 1/2 day **Intervention2005** live symposium uses state-of-the-art, real-time communication between four national sites and multiple leading heart centers across the United States. Attendees may join the **Intervention2005** symposium from one of four regional locations to share live case presentation discussions, hot topic lectures and debates, and interactive analysis on the latest research and practice trends.

This unique conference design allows practice leaders to network and interact with their colleagues in a substantive educational setting that offers a true integration of speakers and audience.

TARGET AUDIENCE

The **Intervention2005** course is designed for cardiovascular practice directors, partners, and senior cardiologists with an interest in coronary and peripheral intervention, thrombosis, angiogenesis and imaging. Other medical professionals from these practices are also welcome to attend.

AGENDA AND TOPICS

Please join our nationally renowned faculty at this unique educational experience! **Intervention2005** will feature the following:

- Live Cases Highlighting Practical Techniques from Leading Heart Centers
- Discussion of Complex Lesion Subsets with Case-Specific Studies
- Carotid Artery Stenting: The Future Is Now – Get Trained!
- Acute MI: Distal Protection – Essential or Not?
- Vulnerable Plaque – Detection, Management and the Latest in Therapies
- An Update on Biodegradable and Bioabsorbable Stents and Stent Coating
- "The Good, The Bad and The Ugly" – A Symposium of Challenging Case Review with Experts
- Gene Therapy Tissue Engineering – Myth, Magic or Marvel?
- Review of New Imaging Methodology

LIVE CASES FROM LEADING HEART CENTERS

Intervention2005 will include live cases from the following prestigious institutions:

- Lenox Hill Hospital – New York, New York
- Mid America Heart Institute – Kansas City, Missouri
- Saint Joseph's Hospital of Atlanta – Atlanta, Georgia
- William Beaumont Hospital – Royal Oak, Michigan

CME

CME will be provided at the symposium. Please refer to our website www.InterventionSymposium.com for updated information.

REGISTRATION

Registration fees are \$495 for Physicians or Industry Representatives and \$195 for Nurses and Technicians.

COURSE OBJECTIVES

Upon completion of this symposium, participants should be able to:

- Discuss the pharmacology and biological effect of drug-eluting stents.
- Describe and identify the indications and strategies for clinical application of carotid artery stents.
- Explore new approaches to pharmacological strategies in the interventional suite.
- Explain the methods of the detection of and management of vulnerable plaque.
- Discuss new imaging methodologies
- Identify treatment strategies for acute myocardial infarction.
- Recognize the regional variation in treating complex coronary artery disease and try to establish a national consensus.

SPONSORSHIP, EXHIBITOR AND MARKETING OPPORTUNITIES

Companies that wish to sponsor or exhibit at **Intervention2005** and **HeartFOCUS2005** may obtain additional information regarding exhibiting and other marketing opportunities online at www.InterventionSymposium.com or by calling 800-251-1569.

AMERICAN COLLEGE OF CARDIOLOGY FOUNDATION

The ACCF and Mocerri Management are working in collaboration to build a premier interventional cardiology educational symposium for allied health professionals. The ACC, a 30,000-member nonprofit professional medical society and teaching institution, is the leading organization dedicated to being an advocate for quality cardiovascular care – through education, research promotion, development and application of standards and guidelines – and to influencing health care policy.
