

Learning Objectives

The overall goal of this course is to enhance participant's competence by promoting the development of skills for those Emerging Faculty who are committed to contributing to ACC's education mission and to facilitate this transfer of knowledge into their professional practice.

Learning Objectives

As a result of attending the course, participants should be able to –

- Demonstrate how to effectively create a non-threatening, interactive learning environment in which individual learning is facilitated
- Recognize and apply major theories of learning in medical education and embrace innovation in program design and implementation which incorporates the foundations of clinical competency and selection of appropriate formats to achieve desired educational outcomes and results in effective presentations
- Reflect and strengthen education practices and personal teaching styles by soliciting and incorporating feedback, modeling “best practice” educator behavior, and incorporating techniques and knowledge of master educators
- Motivate, inspire and exemplify leadership in continuing education of health professionals while comprehending the range of ACC education activities and participating in future ACC activities

EFTS Workshop Objectives

To make you a more effective educator

- Optimize the learning environment
- Apply major theories of learning to program and presentation design
- Improve your personal teaching style

EFTS Workshop Objectives

To inspire you to give back

- Take what you have learned here and mentor others
- Turn your passion of teaching into participation in educational activities at ACC
