

The American College of Cardiology's Chest Pain Center Accreditation

A Quality Improvement Care Model for:

- ✓ LOW-RISK
- ✓ NSTEMI-ACS
- ✓ STEMI
- ✓ RESUSCITATION

ACC's Chest Pain Center Accreditation merges the latest scientific evidence with process improvement initiatives for the care of the patient suspected of having acute coronary syndrome.

Achieve Efficient and Effective Care

Chest Pain Center (CPC) v6 Accreditation is your blueprint for comprehensive and sustainable process and care improvement. Engineered by a team of nationally recognized healthcare leaders, CPC v6 builds upon previous versions of Chest Pain Center Accreditation – combining quality initiatives, current ACC/AHA guidelines, and clinical best practices.

Pair with

Chest Pain – MI Registry™

for STEMI and NSTEMI
data reporting.

Optimize Patient Outcomes and Financial Performance

Reduce the liability of missed heart attacks through a consistent approach to risk stratification of the ACS patient

Improve patient throughput, supporting increased volumes

Reduce costly readmissions

Establish more appropriate length-of-stay

Boost patient engagement leading to improved patient satisfaction scores

CPC Accreditation Designation Options

Both PCI-capable and non-PCI facilities may earn CPC Accreditation. PCI-capable facilities may seek a PCI with Resuscitation designation if it provides a 24/7 targeted temperature management program.

ACC
Accreditation
Services

The American College of Cardiology's Chest Pain Center Accreditation

The Essential Process Improvement Components Encompass:

Administrative support to align the multidisciplinary team's resources with appropriate services.

Expand community awareness of heart attack signs and appropriate response with education programs and outreach.

Examine data metrics to set goals, track and validate performance, and evaluate continuity of care.

Integrate interventions delivered by primary and specialty care providers and EMS first responders.

Coordinate discharge process and follow-up care for patient/family education.

Ensure proper patient placement and treatment based on clinical presentation and risk stratification.

Utilize guideline-directed medical therapies and standardize protocol use to reduce variances of care.

Your Partners in Accreditation

Our accreditation review specialists guide you through the examination and assessment of your operational fitness – without intimidating scrutiny or daunting penalties for non-compliance.

Through their counsel and the use of the Accreditation tool, you'll learn to:

- ✓ Implement evidence-based medicine to support decision making in care of individual patients
- ✓ Track key performance metrics and identify opportunities for improvement
