Breaking News Advances in Heart Failure Management

SATURDAY, MARCH 29, 2025 | 7:00 PM – 8:15 PM CT

MARRIOTT MARQUIS CHICAGO
2121 S PRAIRIE AVE, CHICAGO, ILLINOIS

HYBRID

OVERVIEW

Despite the implementation of guideline-directed medical therapies (GDMT) for heart failure, a persistent and high level of “residual risk” remains, comparable with or even worse than other major cardiovascular diseases. Additionally, many vulnerable patients who are unable to tolerate optimal doses of GDMT, whether due to adverse events or comorbidities, are at even greater risk. In this Medscape Report symposium, our expert faculty will bring you the latest data on emerging therapies for heart failure in a high-energy, newsroom setting.
