

Early Career Section, International Work Group Webinar

Title: When the Going Gets Tough: Shocking Cases for the Early Career Cardiologist

Date: Saturday, June 26th

Time: Eastern Time 11 AM / Central Europe 4 PM/ Arabian Time 6 PM/ Indian Time 8:30 PM

Learning objectives:

- 1) Managing your first critically ill patient as an early career cardiologist
- 2) Navigating the challenges of an early career cardiologist as part of a multidisciplinary shock team, in a new work environment

Faculty:

- Dr. Stanley Chetcuti, University of Michigan
- Dr. Mirvat Alasnag, King Fahd Armed Forces Hospital, Jeddah, Saudi Arabia
- Dr. Ravinder Singh Rao, Rajasthan Hospital Heart Center, Jaipur, India

Moderators:

- Dr. Sena Kilic, St. John Medical Center, Longview, WA
- Dr. Poonam Velagapudi, University of Nebraska

Speakers:

- Dr. Rasha Al-Bawardy, National Guard Health Affairs, Jeddah, Saudi Arabia
- Dr. Auras Atreya, AIG Institute of Cardiac Sciences and Research, Hyderabad, India

Presentation 1: TAVR and Shock

Dr. Auras Atreya, AIG Institute of Cardiac Sciences and Research, Hyderabad, India

Presentation is about patient in cardiogenic shock needing multiple pressors severe aortic stenosis who underwent TAVR. Focus is on coordinating team members and decision making for TAVR versus SAVR, rather than procedural aspects per se.

Panelist Discussion 8 mins

Presentation 2: MitraClip and Shock

Dr. Rasha Al-Bawardy, National Guard Health Affairs- Jeddah, Saudi Arabia

Presentation is about a patient presenting with cardiogenic shock and found to have severe mitral regurgitation, discussion here would be how would you manage the patient with a transcatheter mitral valve repair using a MitraClip.
