

CARDIO-OBSTETRICS ESSENTIALS

TEAM-BASED MANAGEMENT OF CARDIOVASCULAR DISEASE
AND PREGNANCY

Abstract Policies and Procedures

General Information

- All abstracts and cases must be submitted in English.
- Investigators do not need to be ACC members to participate.
- Accepted abstracts and cases must be presented in person at Heart House during the course. Virtual presentations will not be available.
- All accepted presenters must register for the course. Early Bird rates will be offered based on the presenter's membership status (e.g., member, nonmember). Authors will receive specific registration instructions with their acceptance notification.
- General information is subject to change due to circumstances beyond the ACC's control.

Disposition/Notification of Acceptance

You will receive an email notification regarding the status of your submission by August 12, 2025. If accepted, you will be provided with instructions on how to register for the course.

Withdrawals

To withdraw an abstract from consideration, email acceducation@acc.org and provide the title of the abstract or case, as well as the primary author's name. Your notification of withdrawal must be received by September 30, 2025.

Deadlines & Key Dates	<ul style="list-style-type: none"> • All abstracts and cases must be submitted by 11:59 PM ET on Tuesday, July 8, 2025, to be considered. The American College of Cardiology (ACC) is not responsible for submissions not completed by this deadline. • Participants will be notified of their abstract status by Tuesday, August 12, 2025. If accepted, they will be required to register at that time.
Disclosures	<ul style="list-style-type: none"> • Authors will be required to provide financial disclosures for accepted abstracts. Failure of authors to provide disclosure information will result in the removal of an accepted abstract from the program. • Each presenting author will be asked to comply with the ACC Disclosure Policy. Indication of the relationship and the associated commercial entity is required for each presenting author. • Your poster presentations MUST CONTAIN the disclosure information of the presenting author and lead investigator as a part of the poster information. Posters without disclosure information will not be displayed. • Primary responsibility for compliance with any disclosure or nondisclosure requirements resides solely with researchers and/or research sponsors.
Confidentiality	<ul style="list-style-type: none"> • All abstracts submitted in connection with ACC activities are disclosed to members of the peer review selection committee and to ACC employees and contractors as needed.

	<ul style="list-style-type: none"> Although ACC and ACC employees or contractors cannot guarantee the confidentiality of submitted abstracts, every effort will be made to ensure confidentiality of submitted material.
Human Experimentation & Use of Animals in Research	<ul style="list-style-type: none"> Any human subjects research must conform to the principles of the Declaration of Helsinki of the World Medical Association. The Planning Group endorses the position of the American Association for the Advancement for Science in requiring assurances of the responsible use of animals in research. All submissions for consideration must comply with the guidelines.
Copyrights and all other rights	<ul style="list-style-type: none"> The submitting author acts on behalf of all co-authors and in submitting an abstract, transfers to the American College of Cardiology the copyright and all other rights in the material comprising the abstract if the abstract is accepted. Co-authors reserve the following: a) all proprietary rights other than copyright, such as patent rights; and b) the right to use all or part of the abstract in future works of their own. The American College of Cardiology, as holder of the copyright on the accepted abstract, reserves all rights of reproduction, distribution, performance, display, and the right to create derivative works in both print and digital formats.
Good to Know	<ul style="list-style-type: none"> Clarity of expression will be considered in the review process. The overall quality of language used should ensure comprehension by the reader. Authors may use a maximum of five unique abbreviations in the body of the abstract. Place abbreviations in parentheses after the full word the first time it appears. Abbreviations increase the difficulty of reading and evaluating abstracts, which will be considered in the review process. Only commonly used abbreviations should appear in the title of the abstract.
Submission Policies	<ul style="list-style-type: none"> Submissions that do not meet all the criteria listed will not be considered for review. Submission of an abstract constitutes a commitment by the author(s) to present, if accepted. Failure to present and register for the meeting, if not justified, will jeopardize future acceptance of abstracts. There is no limit to the number of abstracts an investigator may submit. The submitting author is considered the presenting author, unless another co-author is appointed to present, and ACC staff is notified of the change. Authors should not submit the same research; abstracts that appear to be replicate versions of a single study will be rejected. Submissions will be checked for duplication and replicated versions will be rejected. Authors should submit their abstract to only one submission type or category. An author must choose the category that best encompasses the abstract subject within the activity. Be sure to review all the abstract submission options before selecting and starting the submission process. Abstracts will be checked for submission in all submission types; if duplication is found, only the latest replicate will be forwarded for review. Abstracts are not eligible for consideration if the paper has been presented at a previous ACC Annual Scientific Session or other ACC course.
