APPLIED HEALTH INNOVATION CONSORTIUM

2022 AHIC Summit Discussion Questions

SESSION 1: How Human Centered AI can improve the patient experience

Discussion Questions:

1. What is the level of evidence necessary for AI to be readily implemented by clinicians ? Do we need randomized controlled trials?
2. What makes an AI company in the healthcare realm worth investing in?
3. How does AI go from a niche to mainstream in healthcare and what's holding it back?

SESSION 2: Addressing Equity and Trust with AI: Challenges and Solutions

Discussion Questions:

1. How do we address the lack of data available for racially and ethnically minoritized communities and rural communities, and the potential result of propagating health inequity even more?
2. How can we best evaluate new AI technologies and their implementation to ensure health inequities are not compounded?

SESSION 3: AI Clinical Use Cases

Discussion Questions:

1. What are the clinical areas/use cases that are ripe for AI?
2. How can AI guide care delivery and interactions with patients and providers?
3. How do we engage other stakeholders that yield a future state where we benefit from AI ?
