

Dear Cardiac Amyloidosis Roundtable participants,

Thank you for accepting the invitation to participate in the American College of Cardiology's (ACC) very first Cardiac Amyloidosis Roundtable: Clinical Gaps and Unmet Needs. As a valued participant, you are joining a group of leading clinical experts to discuss challenges in optimal diagnostic and management strategies in cardiac amyloidosis.

Heart House Roundtables are designed to encourage interactive and thoughtful discussion. Discussions are used to generate actionable content to be used at the point of care. Actionable items generally include expert consensus decision pathways or other policy tools, as well as patient-directed resource development.

After a brief presentation on each topic, participants will work together in small groups to review discussion questions through interactive breakout sessions, then reconvene to share their collective thoughts with the full group. In preparation for the meeting, we have assembled briefing materials comprised of important publications that we believe will provide essential background for discussion at the Roundtable. These materials also include the agenda and discussion questions. We hope that you will have the opportunity to familiarize yourself with these materials before the meeting to facilitate productive discussions. On behalf of the ACC, we look forward to your participation and welcoming you to this virtual event.

Sincerely,
