# Biofourmis Care
Patient Application Tasks

The home screen displays an overview of the day's tasks the participants must complete. To complete a task, tap on the task and follow the on-screen instructions. See the screenshot below to view the task list.

Home Screen

Tasks completed: This shows all completed tasks, along with a progress bar that displays task progress.

Upcoming tasks: This shows all open and uncompleted tasks. Tap on the task to complete it.

Tasks to complete as needed: This shows all tasks that remain open to be completed as needed or as instructed by the study team.

Tasks

You will be assigned daily tasks to complete. Read below for a description of each task category.

Vital sign tasks: These tasks allow you to upload your vital signs manually to the patient application.

Medications tasks: These tasks allow you to indicate that you have taken your prescribed medications.

Evaluations tasks: These tasks allow you to respond to assigned questionnaires about your symptoms and overall condition.
