

The American College of Cardiology's Transcatheter Valve Certification™

A quality improvement solution for hospitals that combines ACC's Transcatheter Valve Certification with current established national clinical databases.

Increased Focus on High Quality Care

ACC's Transcatheter Valve Certification tool is an operational model that merges the latest science and process improvement methodologies. This certification is the result of diligent work by leading interventional cardiologists and cardiac surgeons. It incorporates recent guidelines and expert consensus statements by recognized professional organizations regarding the care of patients requiring transcatheter valve therapies.

The Team Approach to Sustainable Process Improvement

ACC's Transcatheter Valve Certification is an external review and certification process designed to deliver required elements to meet published guidelines, align resources to improve quality, and deliver patient-centered care.

Pair with
STS/ACC TVT Registry™
for data reporting associated with
transcatheter valve replacement
and repair procedures.

Transcatheter Valve Certification — Utilizing Your Current Data Source and Delivering Quality Outcomes

Transcatheter Valve Certification utilizes data from established national clinical databases to support clinical decisions. Facilities already collecting data may be well positioned to rapidly focus on performance improvement efforts.

Links process improvement to patient outcomes.

Assists hospitals in meeting standards for multidisciplinary teams, formalized training, shared decision-making; and utilizes performance improvement to impact data registry performance.

The STS/ACC TVT Registry™ is a collaboration between the Society for Thoracic Surgeons and the American College of Cardiology.

Your Partners in Accreditation

Our accreditation review specialists guide you through the examination and assessment of your operational fitness – without intimidating scrutiny or daunting penalties for non-compliance. Through their external review and the use of the online tool, you'll learn to:

- ✓ Implement evidence-based medicine to support decision making in care of individual patients
- ✓ Track key performance metrics and identify opportunities for improvement
