

The American College of Cardiology's Cardiac Cath Lab v2 Accreditation

Pair with
CathPCI Registry®
for diagnostic catheterization
and/or percutaneous coronary
intervention (PCI) procedures

ACC's Cardiac Cath Lab v2 Accreditation is a comprehensive quality improvement solution that's designed to help you reach established targets of peak performance.

It's the most comprehensive tool for assessing Cardiac Cath Lab (CCL) procedures and processes.

The Focused Approach to Quality Improvement

- ✓ Utilizes NCDR CathPCI Registry® data to support clinical decisions
- ✓ Links process improvement to patient outcomes
- ✓ Promotes consistent processes across the care continuum
- ✓ Peer review designation for unbiased assessment of diagnostic and interventional procedures and risk mitigation associated with adverse patient outcomes

Clinical and Technical Advancements of CCL v2

- Greater alignment with other procedural service lines for hospitals pursuing more than one ACC procedural accreditation
- Additional guidelines from ACC campaigns such as Reduce the Risk: PCI Bleed
- Facility procedure volume tracking to meet state department of health requests
- Enhanced Shared Practices library
- Enhanced guideline criteria for sites implementing same-day PCI discharge
- And important updates:
 - for sites without onsite cardiothoracic surgery
 - for sites that perform device implants
 - to radiation safety and infection control standards

CCL incorporates the most recent ACCF/SCAI¹ Consensus Document for Catheterization Laboratory Standards and other evidence-based science with quality initiatives.

Accreditation Designations Options

PCI-capable facilities with or without on-site cardiothoracic surgery may earn Cardiac Cath Lab Accreditation.

ACC
Accreditation
Services

Participation in the NCDR CathPCI Registry® is a requirement for all Cardiac Cath Lab Accreditation designations.

¹ACCF is an abbreviation for American College of Cardiology Foundation. SCAI is an abbreviation for Society for Cardiovascular Angiography and Interventions.

The American College of Cardiology's

Cardiac Cath Lab Accreditation

The Essential Process Improvement Components Encompass:

Optimization of the organizational platform to align dedicated personnel, operational program model, staff education, and service alignment.

Process improvement initiatives derived from outcomes and metrics related to the facility.

Protocols and policies for appropriate hand off, site management, patient and family communication and education, and discharge.

Continuous process improvement of all aspects of care. (Participation in the NCDR CathPCI Registry™ is required.)

Risk and readiness assessment through multidisciplinary screening processes and protocols to ensure safe and effective Cath Lab procedures.

Interdisciplinary care coordination and communication surrounding sedation, infection control, radiation safety, and universal timeout protocols.

Your Partners in Accreditation

Our accreditation review specialists guide you through the examination and assessment of your operational fitness – without intimidating scrutiny or daunting penalties for non-compliance.

Through their counsel and the use of the Accreditation tool, you'll learn to:

- ✓ Implement evidence-based guidelines to support patient-centered decision making
- ✓ Track key performance metrics and identify opportunities for improvement
