CARDIOLOGY

# THE BUSINESS SIDE OF CARDIOLOGY: *Coding and Documentation*

*Cathleen Biga, MSN, RN*

## Webinar Key Takeaways

1. Know the rules of documentation for the level you are billing
2. Do not use unspecified codes—payers need to know specific diagnoses so they understand the comorbidities of your patients
3. If you use advanced practice providers, make sure you know the rules for incident to and shared services
4. If you get a survey for a CPT code—fill it out!
5. Make sure you read coverage decisions to make sure the imaging test you are ordering is covered by that patient's diagnosis
