Integrating Patient-reported Outcomes into Clinical Care

November 6, 2018

Bray Patrick-Lake, MFS
Director of Stakeholder Engagement,
Director of Research Together,
Duke Clinical Research Institute

Collect Patient Reported Outcomes
- Rank for severity, frequency, importance
  - Symptoms
  - Function
  - Health status
  - QOL
  - Therapeutic burden
  - Adverse events

Inform Care
- Prioritize what’s most important to patient during clinical encounter
- Shared decision making
- Better understand motivation for behavior changes

Design Clinical Trials
- Medical product development
- Comparative effectiveness research
  - Practice

Analyze Evidence

Improve Outcomes, QOL & Patient Satisfaction

Change Practice & Policy
- New therapies
- Guidelines
- Value & Reimbursement
Patient-Reported Outcomes version of the Common Terminology Criteria for Adverse Events (PRO-CTCAE™)
